Heliopolis Camping & Village - Fire Regulation 2024

REQUIREMENTS FOR ELECTRICITY USE

The use of electricity is limited to lighting and the operation of a refrigerator. The use of household appliances is prohibited. The electrical cables, as well as the sockets used, must be EEC-compliant. The guest has the obligation to comply with the technical requirements for the use of electricity listed below: it is mandatory to use electrical cables and devices that comply with the standards. In particular, the cables must be outdoor cables with a maximum length of 25 ml and a minimum cross-section of 2.5 mmq (for currents not exceeding 16A). It is forbidden to join, fix and whatever does not guarantee a protection from the contacts. The plugs must be in accordance with CEI. It is forbidden to perform operations on the electricity distribution column. If necessary, contact the Management. it is mandatory to use only one socket of the column, numbered in the same way as the pad, for the supply of electricity. Otherwise, the Management reserves the right to disconnect the unauthorized outlets, without any notice. This applies to the TV antenna socket where provided. It is forbidden to install (on metal supports, on plants above homes) antennas of any kind for radio-television reception.

REQUIREMENTS FOR USE OF GAS CYLINDERS

Gas cylinders owned by campers must be in accordance with the law and must be properly used and stored. The guest is required to follow the procedures listed below for the proper use of gas cylinders: Before using a gas cylinder it is necessary to secure it to a solid support, by means of chains or with other effective stops. Once secured you can remove the protective cap to the valve. Gas cylinders with a maximum weight of 10 kg may be used. The gas cylinder must never be placed where it could become part of an electrical circuit. The cylinder must never be heated above 50 °C. It is strictly forbidden to bring a flame into direct contact with the cylinder. The cylinder shall be secured to prevent tampering. The user must not change, modify, tamper with, plug the safety devices.

If any, or in the event of a gas leak, repair the full vessels and valves. The cylinder valve shall always be kept closed, except when the cylinder is in use. The valve must be opened gradually and slowly. Wrenches or other tools should never be used to open or close valves with a handwheel, which may be hard to open due to corrosion. Lubrication of valves is not necessary. It is absolutely forbidden to use oil, grease or other combustible lubricants on valves. Before returning an empty cylinder, the user must ensure that the valve is tightly closed, then screw any blind plug on the valve nozzle and then return the protective cap.

REQUIREMENTS FOR IGNITION OF FIRES

It is forbidden to light fires in the camp or on the beach. It is allowed to use open flames exclusively for the use of the kitchen, in the special barbecue areas. It's mandatory to monitor the fire and extinguish it before leaving after use. It's forbidden to light any other kind of fire and use candles for lighting.

REQUIREMENTS FOR OCCUPANCY OF THE PITCH

It is absolutely forbidden to tie tarpaulins to the trees and fence the area of its relevance in a total or partial way with any material. For safety reasons the kitchenettes separated from the veranda must be mounted inside the area of the pitch, facing the street.

REQUIREMENTS IN CASE OF FIRE AND EMERGENCY

In case of fire contact immediately the appropriate telephone number +39 393 9570 363 or go to the Management personally.
